Title: Installing a New Estimating Station

Description: Installing a New Estimating Station

Solution: To load Estimating on a new computer

1) Load Lotus 123 taking all defaults.

2) Please note that if you are using an XP/2000 computer you must create the following folders on the C Drive before loading the Estimate CD;

Dienamic

Lotuswork

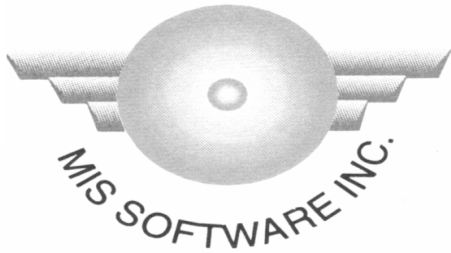

Place the Dienamic Estimating CD in the CD Drive. (Cancel message about autostart) Select the Start button on your desktop and select Run, Browse CD and find the LoadDie?.bat file that corresponds to your Cd Drive.

i.e. If CD Drive is E then select Loaddiee.bat.

Select OK.

The CD will load the required Dienamic estimating set up files.

Remember you must have your P drive set up at this new station. P drive should be mapped to your pp folder on your server.

**Request #: 240028****Faxed to: Common Problems****Attention:****From: Not Applicable**

Copy Estimate Tools Folder from an existing Estimate Computer to the new computer

Once copied use the Copy Estimate from Server to Workstation icon

Start MIS on any computer and Select File, Export Data, Estimating Files

Re Start Estimating on all estimating computers

3) Enter Dienamic MIS - select File, Export, Estimating Files - to replace demo codes loaded in step 1. (If you don't do this, estimators will only see demo data in customer, estimators, salesperson, etc., lookup in estimating).

4) a) Create Estimating Tools folder on the new estimating station. Then create the "Download Estimating from Server" icon on the new station's computer.

(Hint - check an existing estimating station for the program information for this tool).
And run the icon.

or b) If you don't use this Estimate Tool; Copy the c:\lotus\work\estimate.123 file from an existing estimating station to the same folder on the new computer.

5) Start Estimating and select Housekeeping, Update Master, Replace file when prompted.

6) Close Estimating and restart.

7) Test
